MESSAGE *from the* PRINCIPAL

Dear Boys and Girls of the Class of June 1955:

In his most recent book, Walter Lippmann, who is probably our greatest living political philosopher today, states that "there is a body of positive principles and precepts which a good citizen cannot deny or ignore." He wrote this in connection with his analysis of the causes of the rapid decline of liberal democracy and rise of totalitarianism in our time.

Now, I don't think there is any one of us in our country today who will quarrel with the thought expressed by Mr. Lippmann, but it occurs to me that there is perhaps a wide gap between the mere pious acceptance of its meaning and the actual living by it in the course of our everyday life. The foundations of our government were built on such positive principles and precepts, and it is up to us to question ourselves now and then, particularly in the threatening times confronting us today, whether we are living up to the duties and obligations imposed on us by our system of government and way of life, or have grown accustomed simply to render due and proper lip-service to them when the occasion arises. I feel that such examinations of ourselves are especially important at the present time since so many millions of people throughout the world are looking to our country as a guiding beacon in the struggle for freedom and have placed us today in a position of world leadership which we willy-nilly have had to assume.

Let me give you just one example of what I think Mr. Lippmann was getting at. For the past three or four years you have been accustomed to start each school day in your official classes with the rendition of the Pledge of Allegiance. You have doubtless uttered the words clearly and distinctly, with fervor and expression, with sincerity and thought. However, how often have you then later had occasion in your daily rounds to recall the words and their meaning, and to guide your actions and relations with those about you with due regard to the sentiments expressed in your pledge?

We here at Bushwick have tried to teach you that "body of positive principles and precepts" which Mr. Lippmann speaks about, and now, with your graduation imminent, I would like to point out that it is up to you as good citizens neither "to ignore or deny" them.

Good Luck and God Speed.

Cordially yours,

Clara A. Molendyk

ADMINISTRATIVE ASSISTANT

Arthur Finkelstein

Dear Graduates:

You are fast approaching the day which traditionally is a time for looking backward and for looking ahead. It is a time for remembering and a time for planning. It is a time for parties and a time for partings. It is a time of joy and a time of sadness.

You were told, you will remember, on the very first day that you came into Bushwick, that you were coming in as boys and girls and would leave as young men and young women. You now are these young men and women—ready to leave this, your second home of the past years, for the world of work, or higher education, or for the armed services.

There will be many full hearts and even some moist eyes at graduation. These feelings will be caused by many things: regrets over time wasted, opportunities neglected; a knowledge that the paths of people you have learned to care for will cross yours less frequently now; a desire to retain the security of the routines of school; or just the fear of the unknown. Strange as it sounds—you will miss the old place after graduation. But, as is perfectly normal for youth, you will follow along your appointed path, slowly forgetting the sounds and sights which are so vivid to you now and go on to new challenges and new adventures.

We who remain here would like you to know that you are not just an educational statistic, a name on a Delaney card. We shall continue to be interested in your progress and your successes.

We would be very happy to have you become active members of the Bushwick Alumni Association, attend meetings of the P.T.S.A. or return to visit the school. We hope that those of you who feel that you have gotten something worthwhile out of your stay here at Bushwick will co-operate with us in making it an even better place for those who will follow you—and help *Build a Better Bushwick*.

Our best wishes go with you. May you be a source of pride to your parents, your teachers, your community and your nation!

Cordially yours,

Arthur Finkelstein

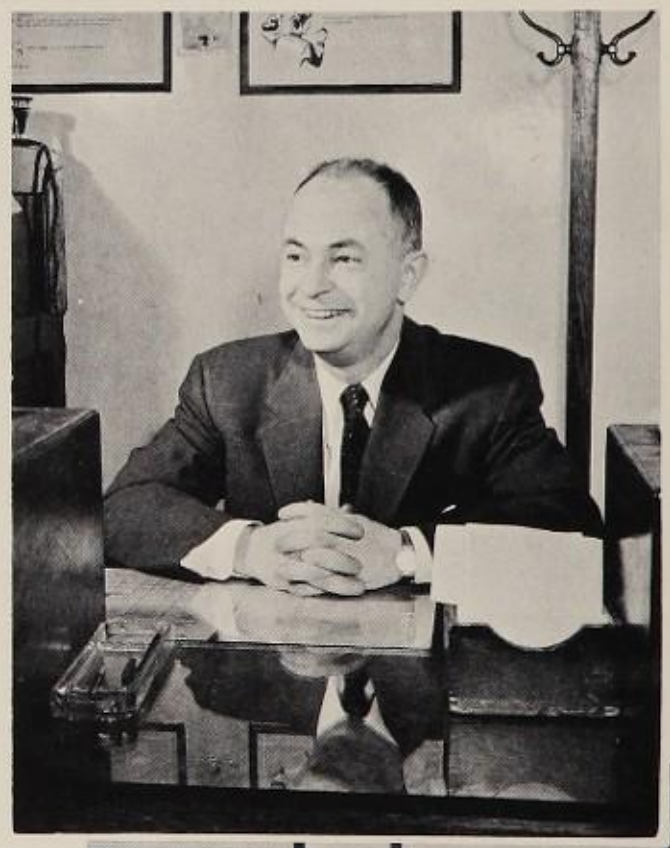
ADMINISTRATION

Mrs. Goldman

DEAN *of* GIRLS

Mrs. La Grasse, assisted by Mrs. Goldman, is always on hand to augment the well-being of Bushwick's girls. Mrs. La Grasse's belief is that to know what children are, you must live and grow with them. Her daughter and two sons have helped her to maintain a tolerant, enlightened, and ever-watchful attitude toward youthful "growing pains." Her opinion as to why some of the students lose stability is that they have not established themselves, and are unable to determine their purpose.

Mr. Goldstein



DEAN *of* BOYS

As Dean of Boys, Mr. Gottlieb, assisted by Mr. Goldstein, handles all problems pertaining to scholastic and social activities which reflect on the boys' school records. Years of work have made him unusually conscious of human beings and their problems. Mr. Gottlieb considers Bushwick students friendly, amenable to discipline, easy to get along with, but not very ambitious. His interests outside of school include fishing, photography and golfing—which we assume is "over" par.

Mr. Aaron Kramer

Mr. Kramer, aided by Mr. Breslin, helps students and teachers plan programs. Other than lost program cards, the one thing that annoys Mr. Kramer is those students who do not work to their full capacity. He believes that many Bushwick students have more ability than they use in class.

An enthusiastic shutterbug, Mr. Kramer has had several suggestions on home movies published in the *New York Post*.

Miss Mary Rosania

Miss Rosania teaches mathematics and gives assistance in the Program Office. As a teacher who greatly enjoys her work, she believes that students who are good scholars make you feel that you are a part of their success.

Although not a musician herself, she loves to listen to the melodies of Jerome Kern and George Gershwin.

Mr. Breslin

Mr. Breslin aids Mr. Kramer in solving the Program Office's endless parade of ever-pressing problems. He may frequently be seen at one of his least enjoyable tasks—that of distributing useful information and guidance to students who thoughtlessly ignore their classes.

In the classroom, hours are made shorter by Mr. Breslin's sense of humor and anecdotes of his European travels.

Mrs. Intemann

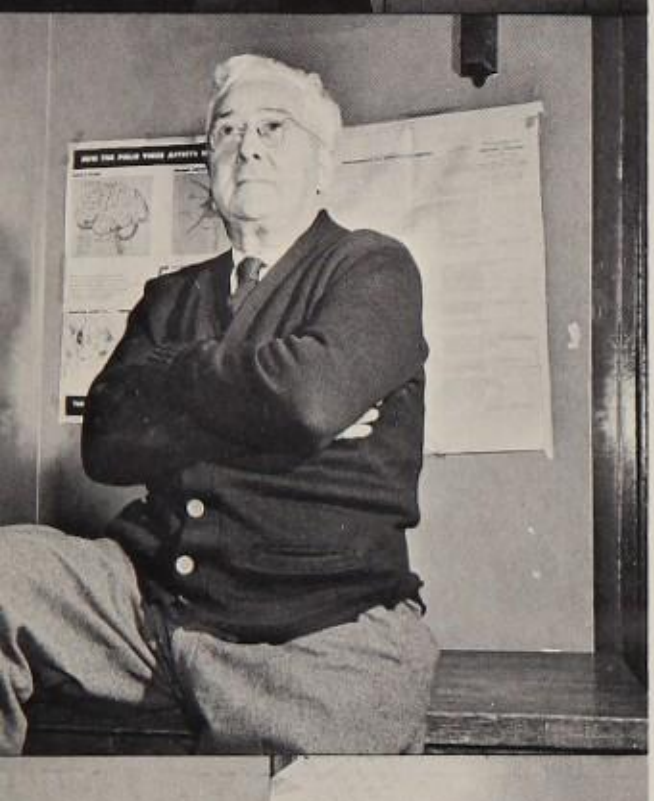
Mrs. Intemann has enjoyed her years of teaching at Bushwick. This year she was particularly pleased that four of her students passed the Gregg Shorthand Awards Test at 120 words per minute. Her work as teacher in charge of transportation consists of distribution of tickets to those entitled to free transportation. The Board of Transportation fixes the eligibility.

DEPARTMENT

REMUNDA CADOUX

A.B., Barnard College; M.A., New York University

Miss Cadoux, who has been with us for one year, is the Chairman of the Foreign Language Department. She received a diploma from the Sorbonne in Contemporary French Literature. Miss Cadoux came to us from Station WNYE where she was the Director of Foreign Language Programs for the Board of Education. She produced radio programs in five languages for which she received three National Awards.



JACOB COHEN

B.S., City College; S.S.P.E., Savage School

Mr. Cohen, who has been with us since 1917, is Chairman of the Health Education Department. In college, he specialized in both mathematics and health education and played on the varsity basketball and baseball teams. This interest in sports led to his becoming a physical education teacher. In addition to teaching, he coached Bushwick's basketball team for five years and the baseball team for ten years.

THOMAS L. DOYLE

B.A., City College of New York; M.A., New York University

Mr. Doyle, Chairman of the English Department, for thirty-two years has helped Bushwick students master our language. He edited *Romeo and Juliet*, Carlyle's *Essay on Burns*, a collection of short stories called *Great Moments from Great Stories*, and *The Little Minister*. These four works are being used in the city schools. During his career, Mr. Doyle has also contributed short stories to various magazines.

JOHN L. FIEDLER

B.A., City College of New York; M.A., St. John's University

Mr. Fiedler is Chairman of the Secretarial Studies Department. He was assistant to the director of business education for the city of New York and was a member of the committee which wrote the New York City Typewriting Syllabus. Mr. Fiedler is proud of Miss Lechleider, Bushwick '42, who is considered one of the finest Gregg writers in the country and is now the only woman reporter in the federal court at Foley Square.

CHAIRMEN

BEN LEVY

B.A., Oberlin College; M.A., New York University

Mr. Levy, who is in charge of the late office, has been teaching in Bushwick for twenty-nine years. While a Bushwick student himself, he participated in baseball, basketball, soccer and track. As a Bushwick baseball coach for twenty years, he has led our team to a Borough Championship and three Division Championships. He has been coaching the soccer team for the past four years.

ABRAHAM LOGIN

B.A.A., City College of New York; M.A., New York University

Cheerful Mr. Login, Chairman of the Accounting Department, has been at Bushwick for five years. He left our school for one term to write a teachers' syllabus in record keeping which will be published sometime next term. Aside from his regular teaching job, Mr. Login does work on taxes and accounting. His young twin daughters, who can be seen visiting Bushwick occasionally, seem to be his pride and joy.

HENRY W. MEISSNER

B.S., New York University; M.A., New York University

Mr. Meissner, who has been associated with Bushwick for thirty years, is the senior member of the Mechanical Arts Department. Before becoming a teacher, Mr. Meissner worked as a mechanic for ten years. He served in the infantry during World War I and was stationed in the U.S. He is active in civic and community affairs and is president of his Community Association at present. Working with tools and gardening are his hobbies.

CYRUS G. MILNE

B.A., City College; M.A., New York University

Mr. Milne, who does wonderful work in the field of art, is Chairman of the Fine Arts Department. Aside from teaching, Mr. Milne is interested in commercial art and has illustrated many books. He has experimented with many modern types of painting, but is particularly fond of oils and water color. He is now a member of the Brooklyn Society of Artists. Tennis, gardening, and his dog "Scamp" are his favorite hobbies.

SAMUEL POLATNICK

B.A., Brooklyn College; M.A., Columbia University

Friendly Mr. Polatnick, Chairman of the Social Studies Department, has won the affection of all the students though he has been here but two years. Among his accomplishments may be noted a chapter, "School Community Relations," in Olsen's *The Modern Community School;* an article in *Social Education,* a publication of the National Council for Social Studies; and several articles for *High Points* magazine.

HYMAN RUCHLIS

B.A., Brooklyn College; M.A., Columbia University

Mr. Ruchlis has been Chairman of the Science Department for five years. He is author of *Exploring Physics,* co-author of *Atomics for the Millions,* and is presently working on a new book, *The Story of Motion.* He was president of the Science Federation of New York, and president of the Physics Club. Mr. Ruchlis has a great interest in construction and tried out his skill by building his own summer home.

GEORGE F. SEUFFERT

B.S., New York University; M.A., New York University

Cheerful Mr. Seuffert, who is in charge of the Music Department here at Bushwick, is the director of music on all special occasions. He has been teaching since 1931 and has taught in Bushwick since 1939. In addition to teaching music, Mr. Seuffert is the Director of Music at Fordham University. He is also an honorary life member of the Canadian Bandmasters' Association and the Bandmaster of the United States Marine Corps.

HARRY C. WOLFSON

E.E., Polytechnic Institute of Brooklyn; M.A., New York University

Mr. Wolfson, Chairman of the Mathematics Department, has been associated with Bushwick since 1928. He is especially interested in mathematical work related to scientific research, astronomy, and electronic computers. Mr. Wolfson was once in charge of the mathematics, astronomy, and chess clubs here at Bushwick. He is now in charge of Audio Visual Instruction which shows educational movies for the benefit of the students.

Charlotte G. Selz

SENIOR GUIDANCE COUNSELOR

from MRS. SELZ

In the poem "Locksley Hall," by Tennyson, there is a particularly apt and happy phrase. The poet speaks of himself as "the heir of all the ages."

An "heir," of course, is someone who receives a bequest or a legacy; and, in the best sense of the term, all of us are the beneficiaries of the great minds of the past. We do not need, for example, to reinvent the telephone or to rediscover a cure for diphtheria in every new generation. Each generation can thank its forebears for what has been transmitted to it.

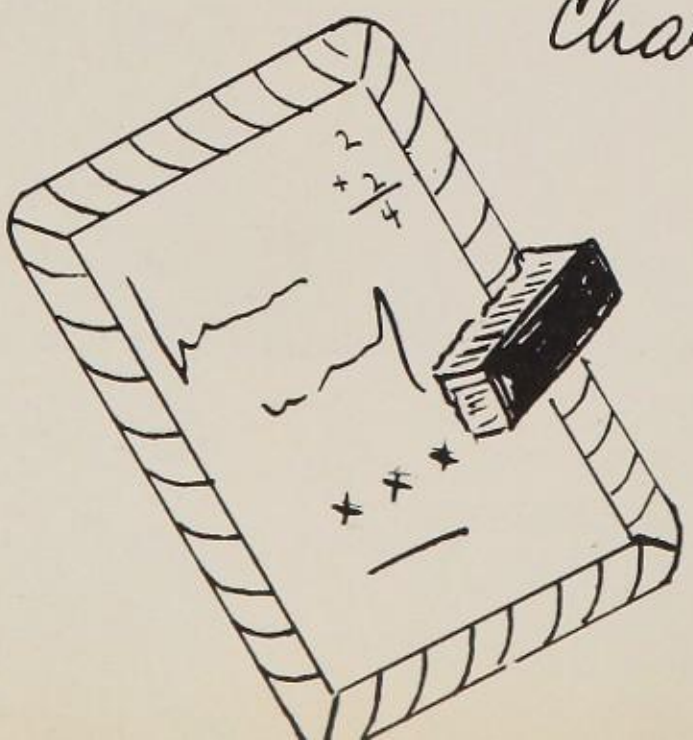
At this moment of your graduation, it is good to think of your own inheritance. The most valuable legacy that you have received, or ever will receive, is the doctrine that education is your right. You have not had to fight or struggle for the privilege of attending school in a free, public system open to all; others won that battle for you. If you occasionally feel that there is something unreal in the picture of a Lincoln trudging six miles to borrow a book, it is probably even harder for you, who accepted the gift of education as your birthright, to conceive that there once was an age when learning was the closely-guarded privilege of the few.

Our beautiful and generous city has given all of you the lavish gift of twelve years of schooling, twelve years of opportunity to cultivate your natural talents and to fulfill your potentialities. This gift was made possible by the efforts of countless large-minded men and women who felt that Man and Society can be refined and ennobled through education for all.

Graduation is a joyous time; it is also a wistful and a solemn one. Perhaps the solemnity arises from our knowledge that we have a debt to pay to those who made life easier for us.

I am sure you will discharge that debt by becoming the type of upright and honorable citizen envisioned by the founders of our great public school system when they gave substance to their dream of universal education.

Charlotte G. Selz



REGINA FITZPATRICK

5th and 6th Term Guidance Counselor

Many words come to my mind as guideposts to success for you: work diligently, plan your future, think straight, develop respect for other's opinions, be a decent human being. Here is the wise philosophy of a man from Assisi; make it yours:

"Lord, make me an instrument of your peace.
Where there is hatred, let me sow love;
Where there is darkness, light;
And where there is sadness, joy."

MRS. KOSS

2nd and 3rd Term Guidance Counselor

It has been a pleasure to work with you both as teacher and counselor. I am delighted with your eagerness to learn, your creativeness, and your zeal for service to the school. I have had fine reports about your service from other departments. As for myself, many of you have rendered such outstanding service in Room 205 that I shall long remember and be grateful to you. My best wishes to you.

MISS MARY OGNIBENE

1st, 2nd, and 3rd Term Guidance Counselor

The change from elementary to senior high school is not an easy one, but a pupil with the right intention should be able to accomplish it successfully. Your guidance counselor is willing and able to help you. If you have questions concerning your present program or your plans for the future, consult your guidance counselor. Let her help you get through Bushwick so that you and your teachers and your parents will be fully satisfied.

MRS. OLSHANSKY

Vocational Counselor

During the past two years in my capacity as vocational counselor, I have had occasion to find positions in private industry for many students. Several employers, so well pleased with the quality of work done by our Bushwick boys and girls, have written to express their satisfaction. I know that in recommending you I am helping to extend the good reputation of Bushwick.

MR. PAYENSON

5th, 6th, and 7th Term Guidance Counselor

The time to think about your future is now. Don't wait until the very last minute before you decide what you want to do. By trusting to luck to get ahead, you may find that you are unprepared when your opportunity arrives. Select a goal, keep it in mind, and work towards it.

MR. ARTHUR RADWIN

4th Term Guidance Counselor

"A work well begun is half-ended"—Plato. As fourth termers, you have completed one half of your high-school work. Bushwick tries to prepare you for your careers and civic responsibilities. But you must contribute your share. Start planning your future now! Set your goals.

Have a pleasant summer. Come back bronzed, strong, healthy, and ready to complete the second half of your education.

DOROTHY SCHUVAL

4th Term Guidance Counselor

As you reach the end of your sophomore year in high school, you gain a deeper insight into what your high-school career means in your life. The period of floundering and adjustment is over. By now your goals and aspirations are closer to realization. If you enjoy your studies and take pleasure in the companionship of your fellow students, in the future you will look back upon this time as the golden age in your life.

MR. GROSS

Military Advisor

Amiable Mr. Gross is in charge of the afternoon session, and also acts as Military Advisor. We might attribute his smile to the privilege of rising late, were it not as friendly at five o'clock as at ten. His sense of humor is as familiar to students as his cheerful inquiry, "How's life treating you?"

Donald R. Calista
PRESIDENT

In reply to a query on education, H. W. Beecher said, "Education is the knowledge of how to use the whole of one's self. Many men use but one or two faculties out of the many with which they are endowed. A man is educated who knows how to make a tool out of every faculty — how to open it, how to keep it sharp, and how to apply it to all practical purposes."

When I first read this, it didn't seem of great importance; then it struck me that this man had a great deal to say. Upon inspection my question was — have our faculties been opened here at Bushwick?

During the past years at Bushwick a wide realm of education has been opened, and for many of us, a still wider realm of human knowledge will open as we go on to college to prepare for professional fields.

When we have finished using textbooks and teachers as the source of our education, experience will play a major role. We must at all times observe what is going on around us in order to keep informed.

So far we have had only fundamental teachings. We are now faced with the enigma of how to apply them toward our final goals. The application of what we have learned and what we will have learned becomes the most difficult task. Beecher says we have to use "the whole of one's self." Knowledge is power, but if not used constructively for our development, it will lie dormant. The best possible way to meet life is to awake each morning prepared and eager for its challenges. With such an attitude we keep our minds forever moving.

Bear in mind that education never ceases.

May the rising sun bring you success and happiness each day.

MRS. WALSH

The co-operative students are fortunate in having Mrs. Walsh as their advisor. Her assistance is invaluable to students who must adapt themselves to being members of the "business world" while pursuing their studies. The success of Bushwick's co-operative course can easily be attributed to her warm personality and tireless efforts.

MISS LEE

No high-school guidance staff would be complete without a college advisor. Here at Bushwick, Miss Lee aids students in the difficult task of choosing an appropriate school for various courses of study. Numerous catalogs, pamphlets and scholarship opportunities have been made available to us. Now that we are leaving high school, we thank her for her patient and kind assistance.

FRESHMEN

We find them wandering about the halls, searching for rooms and running up the wrong stairs, students wearing that unmistakably lost and pathetic look on their faces. But don't laugh at or mock them; we were all there at one time, stumbling as they are.

These "Freshies" are rebuked by sophomores, juniors and seniors alike; until, with the guidance of older friends, they learn the ways of Bushwick—its code of laws and punishments. They soon learn that our school, or any school, is something more than a building. It breathes; it lives and within its walls are generated the friendships, the ideals and the memories that last for a lifetime.

Throughout their school life they will grumble and complain about homework, exams and teachers. There is no escaping this ageless problem. They will soon admit, though, the true facts: pain does not come without pleasure, or schoolwork without fun.

A year passes and the "Freshies" move on, a bit wiser, and a bit older. But they will always remember, with a warm feeling, those first uncertain days.

SOPHOMORES

We come now to the domain of the sophomore—those aging students who feel more or less at home at Bushwick. With a greater run of the school, they participate in the clubs or, possibly, become members of the baseball or soccer teams.

The sophomore has doubtlessly concluded long before now that there is nothing like a co-ed school. Getting acquainted is no longer a problem. How could it be with Mr. Dream Man down the hall, or Miss Dream Girl sitting next to one? Nevertheless, the sophomore is rather surprised to find time for dances and parties.

For the sophomore, there is the customary cramming for exams; but something new has been added—the Regents. A student once said that Regents were created for the purpose of wrecking one's graduation plans. But they are here to stay; and, with a few of them under the belt, one sees that they are really not so hard (?) after all.

Before it seems possible the half-way mark has arrived, and pranks and jokes are left behind for the responsibilities of the junior.

Mr. Goldstein hands out advice over the clicking keys.

JUNIORS

Physics! Algebra! Chemistry! The junior finds them interesting at times and imagines he would be happy if it were not for homework and tests. Despite his innate reluctance, he resigns himself to work, knowing that graduation is nearing.

A junior, expected to be more mature than those below him, becomes aware of his new duties and problems. He not only performs more services to his school, but begins to think of the future and what lies beyond graduation. With the help of guidance counselors, the junior is directed to the many fields open to those with the stability and determination to work toward goals.

With the new co-op course open to all who meet requirements, juniors may receive invaluable working experience while attending classes.

Again, the year soon passes. The junior is proud of his accomplishments, but a little sad with the realization that his high-school days are dwindling. He knows that his return in the fall will be as a student eager to capture the last few measures of pleasure, but devoted to the goal of graduation.

Amazing history with Mr. Heilbraun.

Enjoyment is evident on the faces of Mr. Doyle's students.

The Student Council is the students' representative assembly . . . Bushwick's claim to democracy in action.

With the aid of two representatives from each term, the G.O. officials have capably piloted the Council during their term of office. The leadership and co-operation of Mr. Breslau and other school authorities have made it possible for this organization to function successfully.

Under the auspices of this group, Bushwick's constitution has been revised. They also sponsored a dance, the "Harvest Hop," and, with the assistance of the P.T.S.A., they organized the wonderfully entertaining second annual Talent Show.

The personal experience students obtain in holding Student Council offices is as invaluable to them as their service is to the school. As graduates, it is our hope that future Council officers will lead the student body to new heights in democratic government — to conduct, service and scholarship worthy of the new Bushwick which has been granted us.

The versatile staff of the Bulletin, Brooklyn's oldest high-school newspaper, has, for many editions, brought to the student body a newspaper filled with many factual, fictional, and comical remarks concerning our school. Although many staff members are leaving us this term, we are certain that under the able supervision of Mr. Marcus our paper's fine reputation will be upheld.

SPORTS

Among that athletic group which comprises the baseball and soccer teams, we find a variety of players—everyday Bushwick students, whose hard work and practice paid off in the end with a score of victories.

In acclaiming the teams, we should not forget the two men who have done so much for Bushwick—Radwin and Levy, whose greatest reward has been our boys' fine show of sportsmanship and faith. Although we did not finish in first place, our coaches have confidence that with the coming of new seasons our sports record will be an even greater source of pride.

MUSIC

Someone once said that music is like a spice added to the stew of life. If so; Bushwick is well-seasoned, having no lack of bopsters and budding Beethovens.

Mr. Seuffert, aware of our devotion to rhythm, is constantly alert to nourish each promising note. Under his direction, individual artists as well as groups have developed their talents to a near-professional level.

May Bushwick resound with music forever; we love no art more.

SENIOR ARISTA

To these members of Arista—chosen on the bases of scholarship, character and service to the school—we extend our congratulations.

Arista's goal is to promote the manifold interests of education. Its members have given generously of time and energy—from assisting with freshman orientation to coaching fellow students and supervising classes on special occasions.

We look to the future of Arista with pride, confident that Arista members will continue their excellent standard of service, and that their scholastic records will continue to encourage and inspire the student body.

JUNIOR ARISTA

STUDENT COURT

The door is opened and the defendant walks into Student Court. He is bewildered because he is not familiar with its proceedings. He comes before the judge and jury and finds to his surprise that they are students like himself, and are there to try his case impartially and efficiently.

His case is heard and the court decides that the charge is not a serious one. Since it is his first offense, he is given nothing more than a firm warning.

The Court is supervised by capable Miss Sorrentino. Students act as judges and jury, with Donald Calista presiding as chief justice. Its jurisdiction extends over the lunchroom, cafeteria, study and lobby. Sessions are held every Tuesday and Thursday at 8:00 in Room 107.

All of Bushwick salutes Miss Sorrentino and Student Court members for their services. May they long continue the excellent work which is so necessary to maintain our school's fine reputation.

MUTUAL SAVINGS BANKS

An Introduction

(Compiled by the Hamburg Savings Bank)

Just what is a mutual Savings Bank? In brief, a mutual Savings Bank is an institution, the profits of which, after deducting the amounts necessary to cover the expense of doing business, inure wholly to the benefit of the depositors, or are set aside as surplus for their greater security. Savings Banks came into existence both in this country and in Europe because of the desire of philanthropists to encourage self-providence and better living conditions among the poor of their countries.

The Savings Banks accept the savings of their many depositors for safekeeping. The funds (deposits) entrusted to the Savings Banks are invested principally in bonds and mortgages under strict requirements of law and always with the safety of the funds in mind. In this manner the Savings Banks earn money to pay expenses, to pay dividends to the depositors and to set up reserves for the protection of the depositors.

The Savings Bank have grown with the years. When additional services were needed by the depositors, they were provided so that today the following services are available at most mutual Savings Banks: Savings Accounts, Savings-Insurance Accounts, Mortgage Loans, School Savings, Payroll Savings, Safe Deposit Boxes, Savings Bank Money Orders, Savings Bank Life Insurance, Loans for Modernization and Repairs, Banking by Mail, Christmas Club Accounts, Travelers Checks and Foreign Remittance. In addition, there are many other services which a bank such as the Hamburg Savings Bank renders to the community it serves. In cooperation with the local police precinct, safety programs are provided in the neighborhood schools. Motion picture programs, both educational and entertaining, are available at no cost, to community clubs and organizations. Christmas programs are provided in local movie houses and at the bank for the children of the area. In order to be of further service, the personnel of the Hamburg Savings Bank is constantly active assisting neighborhood drives such as Red Cross, Salvation Army, Boy Scouts, Girl Scouts, United Hospital Campaign and many others. Savings Banks occupy an important place in the life of the communities they serve. Offering the best in modern, convenient banking services is a part of their duty as good community citizens.
